## EXPERIENCE

### Nfq Advisory Services

México

*AI Architect / Delivery Manager I*

*Aug 2026 – Present*

- Designed and implemented real-time voice AI systems, focusing on low-latency interactions for conversational applications.
- Led requirements analysis and solution discovery for AI initiatives across banking areas, assessing technical feasibility and defining implementation strategies.

### Grupo Financiero Inbursa

México

*Artificial Intelligence Systems Analyst*

*Feb 2026 – Aug 2026*

- Developed RAG and SQL-based AI agents using LangGraph and LangChain, integrating LLMs and embedding models through Azure AI Foundry.
- Built OCR pipelines for large-scale extraction and processing of financial data, reducing document scanning time by 90%.
- Contributed to development standards, improving maintainability, consistency, and engineering practices across projects.

### Rombo Works

México

*Python & NLP Developer*

*Jan 2024 – Oct 2024*

- Led the information retrieval team in developing a RAG system to power a chatbot answering natural language queries about the Official Gazette of the Federation of Mexico.
- Implemented retrieval solutions with Python, vector databases and LLM APIs, achieving complete and structured responses across diverse query types and historical periods.

## RELEVANT PROJECTS

### Neural Architecture Search for Convolutional Networks | *Paper, GitHub*

- Developed a Neural Architecture Search (NAS) application for convolutional neural networks using bio-inspired optimization algorithms over real and binary encoded search spaces.
- Integrated surrogate models to predict architecture performance and reduce evaluation cost during the search process.
- Obtained architectures with performance comparable to the baseline while reducing model size by over 30 million parameters.
- Published the research in the ACM GECCO 2026 proceedings and presented the work at GECCO 2026.

### Allearning | *GitHub*

- Developed “Allearning”, a platform to teach competitive programming in C++ through interactive lessons and exercises.
- Built a complementary web application using .NET to make the platform accessible from any device.

## EDUCATION

### Escuela Superior de Cómputo (ESCOM, IPN)

CDMX, México

*B.S. in Artificial Intelligence Engineering — Overall GPA: 9.0/10.0*

*Jan 2022 – Jan 2026*

### CECyT 13, IPN

CDMX, México

*Technical Career in Informatics*

*Aug 2018 – Aug 2021*

## TECHNICAL SKILLS

**Languages:** Python (5 yrs), C/C++ (5 yrs), Rust (1 yr), C#/.NET (1 yr), HTML (3 yrs)

**Frameworks:** PyTorch, TensorFlow, LangChain, LangGraph, FastAPI

**LLM/AI Platforms:** Azure AI Foundry, OpenAI SDK, Google Gemini

**Infrastructure:** Docker, Linux, Git/GitHub, Azure

**Databases:** MySQL, SQLite, Chroma DB

## SPOKEN LANGUAGES

**Spanish:** Native

**English:** B2 – Upper Intermediate (CEFR)

**German:** A2 – Elementary (CEFR)

## APTITUDES

Software Architecture, Code Optimization, Logical Reasoning, Problem Solving, Teamwork

## AWARDS AND CONTESTS

### Mexican Olympiad in Informatics (OMI)

*Second Place – State Competition*

*2019*

- Earned a silver medal at the state level in the Mexican Olympiad in Informatics.

### International Collegiate Programming Contest (ICPC)

*Top 100 in Finals*

*2020*

- Ranked among the Top 100 teams in the Mexican Regional Contest.
